

HARDENED TELESCOPIC-LINE

HARDENED TELESCOPIC RAILS FOR HIGH DUTY CYCLES

- **Linear guide rails** with recirculation sliders and **telescopic rails** with partial and full extension, available for size **28, 33** and **43**.
- **Optimised internal geometries** to maintain reduced clearance and smooth rolling even under high loads.
- Guides made **entirely of steel**, with **cold drawn profiles** and **induction hardened tracks**.
- Ideal for applications characterised by **continuous processes**, **high duty cycles** and **heavy loads**.
- **Customised** drilling, lengths and surface treatments on request.

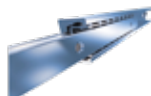

Customised products: the **best solution** for your motion needs

Linear guide systems

Linear modules

Telescopic rails

Rod ends and spherical plain bearings

Bearings and cam followers

Ball screws

Adjusting nuts and threaded rings

Complete systems
